Total Control from the Warehouse to the Worksite

Easily Access and Manage Real-Time Inventory Data

The Problem: Legacy Systems Stop at the Warehouse Door

Traditional systems have limitations that can make it difficult to manage project materials, inventory, high-value assets, and operational processes outside the warehouse. Once your people, products, and workflows leave the building, visibility disappears—and that blind spot creates costly mistakes, delays, and accountability gaps.

The Solution: Cloud Inventory for the Field

With Cloud Inventory, you gain real-time control over everything outside your four walls—regardless of location, device, or connectivity. Know the state, location, and authenticity of your assets, people, and processes at all times, so your team can respond quickly and accurately when the unexpected happens.

- **Never lose track of what's in the field.** A complete chain of custody keeps you informed of where inventory is, anytime and anywhere.
- **Empower field teams to capture data easily.** Mobile-first applications make it simple for workers on the go to log what they need, exactly when they need to.
- **Eliminate waste and idle inventory.** Teams can request items directly, while visibility into unused assets enables fast, efficient redistribution.
- **Keep access controlled and relevant.** A persona-based interface ensures partners, contractors, and employees only see the information they need.

Whether it's a service call, sales activity, or delivery run, you can use Cloud Inventory to make real-time visibility a reality for every corner of your operation.

EXAMPLES OF CUSTOMER GAINS

Reduced tool purchases by **10%**

Reduced field losses by **30%**

$8M Recovered in usable assets

200% Reduction in time for daily field tickets

Increased on time in full by **10%**

KEY CAPABILITIES

A comprehensive library of mobile-first applications equips your people to execute flawlessly in the field, with key capabilities including:

Field Inventory Management | **Order Fulfillment** | **Service Work Orders** | **Tool Tracking** | **Data Capture**

Field Inventory Resolves Your Mobile Inventory Challenges

FEATURES:

Inventory is an expensive part of any business. If you have teams managing equipment or parts in yards, forward staging areas, or on trucks, you may be like many others who struggle to track receipt and usage of that inventory. Cloud Inventory gives you the power to transform your end-to-end supply chain into a truly integrated value chain.

You can utilize key features including:

- **Mobile-first applications**
- **Real-time updates and offline (disconnected) capabilities**
- **Complete inventory visibility and process traceability end-to-end, across your entire supply chain**
- **Single inventory system of record**
- **Quick to implement**
- **Pre-built ERP integrations**
- **Multi-language support**

COMMON INDUSTRIES WE SERVE

- Oil & Gas
- Telecom
- Utilities
- Mining
- Field Services

How Azuria Water Solutions Used Mobile Apps to Reduce Field Ticket Creation Times By 200%

Azuria Water Solutions is a leader in the pipe maintenance industry. The company's 400+ field crews were all creating field tickets by hand, which often led to delays in information being captured, limited visibility into what was happening in the field, and impacts to customer service levels. Azuria needed the ability to share information with more people in a timelier way.

With Cloud Inventory, Azuria has been able to modernize its processes across its business in both the U.S. and Canada. The company has used the Mobile Enterprise Platform to significantly decrease the time it takes to complete invoices; what used to take weeks now takes only a day. In addition to streamlining daily tasks for its team, Azuria has significantly improved service levels for its customers. With data at their fingertips, users can report and bill work as it is completed.

RESULTS

- Eliminated paper-based processes and mobilized the organization
- Developed and deployed applications that solved specific business challenges while integrating them into the company's ERP system
- Reduced field ticket creation times by 200% using mobile data capture
- Increased accuracy in customer billing and invoicing processes
- Reduced total cost of ownership (TCO) by implementing a single platform with few additional IT needs

"When it comes to the type of information that we capture in the field itself, there was nothing out of the box available to address those needs. That's where the custom development piece on the Cloud Inventory side helped us tremendously."

– Thys Lourens, CIO at Azuria Water Solutions

Field Inventory Resolves Your Mobile Inventory Challenges

Give your field workers and back office employees the tools they need to boost productivity.

SOLUTIONS INCLUDE

Field Inventory Management

- PO Receipt
- Miscellaneous Receipt
- Inventory Transfer (Put Away)
- Order Pick
