CLOUD INVENTORY®

MANUFACTURING

Boost Efficiency Across Your Entire Production Process

Capture Materials Usage at the Moment of Consumption

The Problem: Shop Floor Blind Spots Cost You Time, Money, & Orders

As a manufacturer, you likely face constant pressure to deliver on time in full—but without real-time visibility into shop floor operations, critical issues can go unnoticed until it's too late. Disconnected processes and siloed data make it difficult for leadership and operators to stay aligned, resolve problems quickly, and hit production targets consistently.

The Solution: Cloud Inventory for Manufacturing

Cloud Inventory closes the visibility gap. With a single, live view of your manufacturing operations, every team member has the information they need to make faster decisions, prevent disruptions, and deliver on customer commitments.

- **Streamline core manufacturing processes.** Custom workflows for build-to-order (kitting), build-to-stock, and inspections reduce friction and keep operations moving.
- **Meet customer demand with confidence.** End-to-end visibility into shop floor execution keeps your team on track for on-time in-full deliveries and production goals.
- **Resolve issues before they disrupt production.** Real-time data highlights critical problems instantly, so the people closest to the work can act on immediate information and keep work cells running.
- **Improve performance and eliminate waste.** Track raw material consumption and machine/asset performance in a single view to maximize throughput, improve production yield, and identify inefficiencies before they compound.

Cloud Inventory puts the right data in the right hands at the right time—so your shop floor runs leaner, faster, and smarter.

EXAMPLES OF CUSTOMER GAINS

Increased productivity **20%**

Reduction in saftey stock **32%**

30% Lower carrying costs

99.9% Average inventory accuracy

Reduced production lead time **10%**

KEY CAPABILITIES

A comprehensive library of mobile-first applications equips your people to execute flawlessly on the shop floor, with key capabilities including:

- Materials Tracking
- Order Fulfillment
- Work Order Completion
- Kitting
- Kanban

Cloud Inventory for Manufacturing

BENEFITS:

Inventory is an expensive part of any business. Cloud Inventory gives you the power to transform your end-to-end supply chain into a truly integrated value chain by putting inventory execution and traceability in the hands of those closest to manufacturing materials, and ensuring your entire business has real-time information about them.

You can utilize key features to:

- Pivot your operation from a supply chain cost center to a revenue generator
- Quickly understand the job and order status associated with any work order
- Gain visibility across every work order
- Improve production yield with accurate stock availability
- Reduce inventory shrinkage and waste
- Achieve faster build cycles
- Single inventory system of record

How Gold Eagle Improved Inventory Accuracy on Its Shop Floor

Gold Eagle manufactures and distributes automotive chemicals designed to protect and improve the performance of a range of vehicles and equipment. Manual processes on the shop floor were causing a lack of visibility, delayed transaction processing, and inaccurate inventory statements. The company needed a solution that could help it address these inefficiencies.

With Cloud Inventory, Gold Eagle now has a single solution to increase supply chain visibility and execution at multiple locations. Team members can use mobile devices to input inventory, work order, and pick/pack transactions right from the shop floor. They can also use Cloud Inventory for transactions in the production area, including work order completions and return-to-stock processing.

RESULTS

- Increased inventory accuracy by equipping teams with real-time data
- Achieved end-to-end visibility across the supply chain
- Increased transaction response times while maintaining an efficient shipping schedule
- Eliminated manual processes in the plant
- Improved automation in the receiving, inventory, and picking areas of warehouses
- Optimized use of existing ERP system, Oracle JD Edwards EnterpriseOne

"Cloud Inventory allows us to present our shop floor users with the information they need when they need it."

– Mashaune Hardy, Senior Business Analyst at Gold Eagle

About Cloud Inventory

Cloud Inventory powers breakthrough inventory control. Our cloudbased and on-premise inventory management solutions offer real-time, end-to-end visibility at every touchpoint in the supply chain, from manufacturing and warehousing to the field and beyond. Our robust solutions help clients increase productivity, compliance, inventory optimization, and revenue generation. Founded in Kansas City, MO, more than 40 years ago, our global team has the supply chain expertise to deliver solutions that solve today's business challenges by providing true inventory visibility and control.

We proudly serve hundreds of customers around the world in such industries as: manufacturing and distribution, medical device, construction and engineering, oil and energy, utilities, and food and beverage.

What Can Cloud Inventory Do for You?

- **Increase Revenue**
- **Boost Productivity**
- **Optimize Inventory**
- **Improve Compliance**

Our team of supply chain experts is ready to discuss how you can achieve complete inventory control.
