CLOUD INVENTORY® ENTERPRISE PRINTING PLATFORM™ LABEL & FORMS

Control your barcode labeling and report forms printing from your web browser

Cloud Inventory's Enterprise Printing Platform (EPP)™ equips you to create, manage and print labels and reports with your ERP. Designed specifically for enterprise printing needs, EPP helps you manage users and printers, set alerts, redirect print jobs, dynamically adjust labels on the fly, control printing at business partner sites and more—all from your web browser.

EPP is designed to work seamlessly from anywhere. As a web-based tool, deployments and upgrades are straightforward and your IT staff has centralized control over the environment.

THE ENHANCEMENT ENGINE CREATES A DYNAMIC LABELING ENVIRONMENT

- Create your own forms like pick report, bill of lading, receipt and packing slip
- Create labels like inbound, shipping and carton content
- Automate hazardous product labeling to ensure compliance
- Manage serialization and lot compliancy with a single source of truth
- Send email alerts or trigger events based on final label disposition
- Use supplied templates or create your own based on your company and specific needs

REMOTE PRINTING FROM ANYWHERE EXPANDS CONTROL OF YOUR ENVIRONMENT

- Ensure inbound labeling is compliant to improve dock-to-stock time, improve business partner relationships and reduce relabeling costs
- Control downstream business partner labeling to provide visibility into shipment status, improve the customer experience and raise the bar on your competition
- Set up temporary warehouses with ease

USE CASE SCENARIOS

CALL A WEB SERVICE

Call a weather service to determine packaging or add a note to "refrigerate immediately."

LOCALIZE END USER INFORMATION

Determine label language and proper date format based on delivery location.

TRIGGER CUSTOMER NOTIFICATIONS

Trigger an email notification when labels are created.

SERIALIZATION ACROSS DISPARATE SYSTEMS

Use a single source of truth to assign serial numbers, eliminating the potential for duplication.

HAZARDOUS PRODUCT COMPLIANCY

Manage GHS compliancy without the expense of color printers. Print proper hazardous statements, signal words, instruction and supplementary information based on product included in the package.

PRINTER SUPPORT

EPP supports a wide variety of industrial, mobile and desktop printers.

CLOUD INVENTORY® ENTERPRISE PRINTING PLATFORM™ LABEL & FORMS

Flexible, easy-to-implement, affordable enterprise label integration

PRINT ENVOY IS A FULLY-INTEGRATED LABEL PRINTING SYSTEM

Print Envoy provides a quick and simple method for linking your ERP to many of the most popular enterprise labeling platforms, including Cloud Inventory EPP, Bartender, TekLynx and CodeSoft. Print Envoy's seamless integration and flexible configuration options make for a pain-free, rapid implementation.

FAST, FLEXIBLE AND CONFIGURABLE

- Print setup couldn't be easier. Automated setup tools make it easy to configure Print Envoy
- Dynamic data integration ensures everything your ERP knows about your inventory is available to send to labels—even your own custom fields
- Establish context-sensitive rules to dynamically determine label routing and printer selection
- Enhances Advanced Warehouse (WHS) mobile device processes with enterprise-grade label printing
- Powerful, yet easy-to-use API provides the ability to set print actions anywhere that you (or your VAR) wish, with a single line of code
- Print Envoy's Courier Service allows for transmission of labels to remote servers both in the cloud and on-premise

VERSATILE INTEGRATION OPTIONS

Cloud Inventory's Print Envoy integrates with all the most common enterprise labeling solutions, allowing you to create a seamless flow of communications and transactions to optimize your printing workflow.

READY-TO-PRINT FEATURES

Print Envoy is pre-wired to support most environments where labels are likely to be printed. Print Envoy gives users the option to print automatically upon posting or on request via integrated print buttons.
